Panita Euawongyart

UX/UI Design Team Lead · Product Ownership Track

088-924-4616 panita.eu@gmail.com linkedin.com/in/panita1990 panitaeu-portfolio.vercel.app

PROFILE

Product-minded UX/UI Design Team Lead with 8 years of experience across mobile app, web app and enterprise systems. At TMES, I turn business briefs into scoped product decisions without a dedicated BA, working with PM, developers, QA and Sales & Marketing across several client projects at once. Looking for a Product Owner role where I can own priorities, work with stakeholders and keep the user at the centre.

EXPERIENCE

TMES Co., Ltd.
UX/UI Design Team Lead
Mar 2025 - Present

- Turn vague business briefs into scoped decisions, e.g. the BMS transaction redesign from an MD brief with no formal spec: audited the flow, separated real business rules from habit, and prioritised the critical fields
- Scope requirements for several concurrent client projects (DoiTung, SBCS) with PM, developers, QA and Sales & Marketing; use AI tools to support scoping and requirements gathering in the absence of a dedicated BA
- Reuse the company's existing system structure across clients to shorten delivery (DoiTung: from an estimated 2–3 weeks to 1–2 weeks, my own estimate)
- Lead the design team: plan each month's priorities in 1:1s, review designs with the team and the MD

Socket 9 Co., Ltd.
Senior UI Designer
June 2019 - Mar 2025

- Partnered with the Business Development team on pitch designs (new and redesigned mobile and web apps) for SME, enterprise and government clients, turning sales briefs into designs
- Researched competitors for each pitch to shape structure and features
- Worked with developers to implement new features and maintain site usability
- Managed and coached junior designers to collaborate in a team and deliver products to customers

PT&T Co., Ltd.
UX/UI Designer
Sep 2018 - Jun 2019

- Partnered with AIS and co-designed with their product team
- Designed AIS Cloud Plus, a mobile app for backing up users' data safely
- Worked with developers on performance improvements
